SECTION 00

Positioning Recap

ALLCURO is a three-sided healthcare marketplace — structurally similar to Airbnb (inventory + booking + reviews), OYO (standardised quality across independent operators) and Zomato/Urban Company (hyperlocal discovery + on-demand booking) — applied to home healthcare.

Side	What they list / offer	ALLCURO's role
Home Care Centres	Beds, elderly care homes, rehab centres, physiotherapy & day-care centres	Marketplace host (like a hotel on Airbnb)
In-house Nurses	Nursing visits, attendants, part-time / full-time shifts	ALLCURO-employed or ALLCURO-verified gig workforce
Equipment Owners / ALLCURO Inventory	Wheelchairs, hospital beds, oxygen concentrators, BiPAP, monitors	Rental marketplace (like a tool-rental Airbnb)
Customer	Patients / families	Demand side — one checkout for all three

Tagline options

- **“Healthcare, Made Simple.”** — primary; calm, promise-driven
- “Care you can trust, at your doorstep.”
- “Book care like you book a cab.”
- “Your family's health, one tap away.”

SECTION 01

Brand & Visual Language

Look and feel guidelines carried across every screen

	Choice	Reasoning
Background		
Primary brand colour		
Secondary accent		
Success / verified		
Alert (sparingly)		
Text primary		
Font family		
Corner radius		

2.1 Splash → Onboarding

- Splash screen — logo + tagline animation (heartbeat-line morphs into the “A” of ALLCURO)
- Location permission (“Find care near you”) — city / pincode auto-detect, editable
- Language selector (Hindi / English + regional) — elderly-care customers skew regional-language
- Login / Signup — mobile number + OTP (primary), Google / Apple sign-in (secondary)

2.2 Home Page

Bottom navigation: **Home | Bookings | Equipment | Chat | Profile**

Top of home

- Location bar (change city/area) + search bar (“Search nurse, home care centre, equipment...”)
- Emergency / urgent-care banner — one-tap “Need care in the next 2 hours” priority routing

Category tiles (Zomato-style horizontal scroll)

- Home Care Centres — elderly care homes, rehab, day-care
- Book a Nurse — visit / hourly / 12hr / 24hr / live-in
- Rent Equipment — hospital bed, wheelchair, oxygen concentrator, BiPAP/CPAP, monitors
- Specialised Care — post-surgery, palliative, dialysis support, mother & baby care, physiotherapy
- Add-ons — lab tests at home, doctor teleconsult (phase-2 upsell)

Discovery feed sections

- “Top-rated centres near you” (card carousel)
- “Nurses available today” (avatar strip with a green “available now” dot)
- “Offers for you” (coupon carousel)
- “Recently viewed”
- Trust strip — “10,000+ verified nurses · 500+ certified centres · 24/7 support”

2.3 Home Care Centre Listing Page (Airbnb-style)

- Photo gallery — minimum 8 photos required at listing time (room, bathroom, common area, dining, exterior, staff, certificates on wall, kitchen/hygiene area)
- Name, locality, city + map pin
- **Rating** split into sub-scores: Hygiene, Staff Behaviour, Medical Care Quality, Food, Value for Money
- **Price** — per day / per month, “starting from ■X/day”
- **Occupancy / availability calendar** — Airbnb-style date picker; “Only 2 beds left this week” urgency nudge
- “Operating since” (years in business) + ALLCURO Verified badge
- Services included (chips) — doctor visits, physiotherapy, 24/7 nursing, meals, ambulance on call, CCTV, family visiting hours
- Staff-to-patient ratio — a homecare-specific trust signal Airbnb doesn't need but is critical here
- Government registration / licence number displayed
- Reviews section — verified-stay only, photo reviews allowed
- Sticky bottom bar — price + “Check Availability”
- “Chat with centre” / “Schedule a visit before booking” — families want to see the place first

2.4 Nurse Profile / Listing Page

- Photo, name, ALLCURO ID badge
- **Nurse level:** GNM / ANM / B.Sc Nursing / Critical Care Certified / Attendant — priced by tier
- Experience (years) + specialisation tags (elderly, post-op, pediatric, palliative, ICU, ventilator, diabetic, dialysis)
- Languages spoken
- Rating + auto-tagged review highlights (“Very punctual”, “Gentle with patients”)
- Availability calendar — Full-time / Part-time / Live-in, by Morning / Evening / Night / 24-hr shift
- Price per shift / hour / day
- Verified-documents badge (Aadhaar + nursing council + police verification + medical fitness), shown as icons, not raw documents
- Background-check status — “Police Verified ✓ · Medically Fit ✓ · Reference Checked ✓”

2.5 Medical Equipment Section (kept structurally separate)

- Own tab in bottom nav: **Equipment**
- Categories — Mobility (wheelchair, walker, commode), Respiratory (oxygen concentrator, BiPAP/CPAP, nebulizer), Hospital Furniture (bed, ripple mattress), Monitoring (BP monitor, oximeter, glucometer), ICU-grade (syringe pump, suction machine)
- Each item card — photo, rent per day/week/month, refundable security deposit, availability by pincode, Buy-vs-Rent toggle
- Delivery & pickup scheduling with slot selection
- Condition disclosure (New / Refurbished-Grade A) + sanitisation certificate photo
- Simple deposit-based checkout; deposit auto-refunds after pickup + inspection

2.6 Discounts & Offers Engine

- First-booking discount (e.g. 20% off first nurse booking)
- Long-duration slabs, auto-applied — 7+ days = 5% off, 30+ days = 15% off
- Referral program — “Refer a family, get ■500 ALLCURO credit”
- Bundle discount — nurse + equipment combo
- Festival / seasonal campaign banners (admin-controlled)
- Wallet / ALLCURO Credits for refunds & cancellations
- Coupon code field at checkout

2.7 Checkout — Kept Deliberately Simple

Step	Stage	What happens
1	Select	Centre / nurse / equipment + dates or duration
2	Confirm requirement	One short form — condition dropdown, mobility level, optional notes
3	Address	Saved address or map pin
4	Review price	Base cost, discount, platform fee, GST, total — fully transparent
5	Payment	Razorpay checkout — UPI / Card / Netbanking / Wallet / EMI, or “pay part now, rest on arrival”
6	Confirmation	Booking ID, contact details, track booking, invoice download
7	Post-service	Rating prompt + re-book shortcut

TARGET Total taps to book a nurse: roughly five — matching the “very simple” requirement.

SECTION 03

Customer Sign-Up & KYC

Light-touch by default, fuller only where risk is higher

Customers need light-touch KYC (not full medical-provider-grade) because friction here directly kills conversion — but some KYC is required since real people/nurses are entering their homes.

- Mobile number + OTP verification (mandatory — also doubles as fraud prevention)
- Name, email (optional at this stage)
- **Address verification** — GPS pin + manual address; a one-time verification call for first bookings
- Optional but incentivised: government ID (Aadhaar/PAN) upload — unlocks higher-value bookings
- Government ID becomes **mandatory** for: equipment rental (deposit linkage), live-in/overnight nurse bookings, and long-duration (7+ day) centre admissions
- Emergency contact (second family member's number) — recommended
- Payment method saved for faster re-checkout

WHY IT MATTERS This tiered KYC — light for browsing/short visits, fuller for overnight/high-value bookings — keeps signup frictionless while protecting nurses and the platform where the risk is real.

SECTION 04

Nurse Sign-Up & Dashboard

Full-time and part-time enrolment

This is the most sensitive onboarding flow, since a verified stranger enters someone's home — treat it with Uber-driver-grade plus medical-council-grade verification.

4.1 Sign-up flow

#	Step
1	Mobile number + OTP
2	Basic details — name, DOB, gender, city, address
3	Employment type — Full-time (ALLCURO payroll) or Part-time (per-shift gig)
4	Qualification & experience — ANM / GNM / B.Sc / M.Sc Nursing / Certified Attendant / Physio-assistant, years, previous employer(s)
5	Document upload — govt ID, Nursing Council registration, educational certificates, latest pay slip, address proof, live selfie-match photo
6	Medical fitness certificate — self and TB/health screening report
7	Police verification / background check — mandatory via third-party API before the profile goes live
8	Reference check — 1–2 previous employer/supervisor contacts, called by ALLCURO ops
9	Skills & specialisation tags — ICU, palliative, pediatric, geriatric, wound care, ventilator, dialysis-assist, diabetic care
10	Bank details for payouts — linked to Razorpay Route/RazorpayX
11	Video interview / in-person orientation booking — final human step before activation
12	Profile enters Admin Verification Queue → “Under Review” → “Verified”, only then visible to customers

Additional security features

- Live selfie + ID face-match at login for a period — prevents profile sharing/impersonation
- In-app SOS/panic button for both nurse and patient's family during a visit
- GPS check-in / check-out at each shift — proof of visit + safety tracking, like a ride-hailing trip log
- Two-way rating — families rate nurses, but nurses can also rate households, protecting nurses from unsafe environments
- Re-verification reminder every 12 months (police verification, medical fitness renewal)
- Document-expiry auto-flagging — profile auto-pauses if a licence lapses and isn't renewed

4.2 Nurse Dashboard (post-verification)

- **Home** — today's shift, upcoming bookings, earnings summary
- **Availability calendar** — toggle days/shifts (Morning/Evening/Night/24-hr), block leave dates
- **Job requests** — accept/decline for gig nurses; auto-assign for full-time payroll nurses
- **Earnings** — per-shift breakdown, incentives, monthly statement, TDS summary, downloadable payslip
- **Training & certification** — micro-courses with badges added to the public profile, enabling skill-based pricing tiers
- **Ratings & feedback** — view reviews, respond
- **Support / SOS** — direct line to ALLCURO ops for emergencies
- **Document vault** — renew/re-upload expiring documents
- **Referral** — nurse-refers-nurse bonus

Home Care Centre Sign-Up & Dashboard

Easy for legitimate operators, hard for illegal ones

5.1 Sign-up / verification flow

- Business mobile + OTP, then business email
- Entity details — centre name, type (elderly care / rehab / day-care / physiotherapy / palliative), year established, ownership type

Mandatory legal documents — the core “legitimacy filter”

- Business registration certificate (Shop & Establishment Act / incorporation / trust deed)
- **Clinical Establishment Act registration** or equivalent state health-department licence
- Fire NOC / building safety certificate
- GST registration (where applicable)
- PAN of entity + owner Aadhaar
- Staff list with qualifications for every nurse/doctor/attendant on payroll, plus their individual certificates
- **Biomedical waste management authorisation** — a strong filter most unlicensed setups cannot produce
- Fire & safety compliance photos, ambulance tie-up proof (if claimed)
- **On-site verification visit** — an ALLCURO field agent physically inspects the centre before go-live, capturing photos/video (non-negotiable, mirrors OYO's hotel-onboarding audits)
- Bank account + GST for settlement (Razorpay Route sub-account)
- Listing creation — photos (minimum enforced), pricing per package, services included, staff ratio, room types, sample food menu
- Status progression: Pending Admin Review → Site-Visit Scheduled → Verified & Live

5.2 Home Care Centre Dashboard

- **Listing management** — edit price, photos, availability/bed count in real time
- **Booking requests** — accept / reject / waitlist admissions
- **Occupancy tracker** — visual bed-occupancy chart
- **Revenue dashboard** — bookings, payouts, pending settlements, commission deducted
- **Reviews & ratings** — respond to reviews publicly
- **Compliance centre** — renewal reminders for licences; listing auto-suspends if a critical licence lapses
- **Staff management** — roster with certificates, feeding the centre's staff-to-patient trust signal
- **Promotions tool** — opt into discounts / featured placement (paid visibility, a monetisation lever)

SECTION 06

Admin Panel

ALLCURO's internal control centre

Module	What it does
Verification queue	Unified inbox for pending nurse / centre / equipment-vendor KYC, document viewer, approve/reject/request-more-info, audit trail
User management	Customers, nurses, centres, equipment vendors; suspend/ban, full activity history
Booking operations	Live map/list of active bookings, SOS alerts in real time, manual re-assignment on last-minute cancellations
Payments & payouts	Razorpay ledger, per-category commission rules, automated payout scheduling, refund/dispute management
Content management	Homepage banners, discount campaigns, featured listings, push-notification composer
Ratings & complaints	Moderation queue for flagged reviews, dispute-resolution workflow
Compliance tracker	Dashboard of expiring licences/certificates, auto-reminders, auto-suspension rules
Analytics	GMV, city-wise demand heatmap, category growth, churn, repeat-booking rate, CAC/LTV
Support / ticketing	Integrated helpdesk for escalations
Role-based access	Ops team, finance team, city managers, super admin — separate permission tiers

Payments — Razorpay Integration

- **Razorpay Checkout** — UPI, cards, netbanking, wallets, Pay Later/EMI at customer checkout
- **Razorpay Route** — automatic split settlement: customer pays ALLCURO, commission is retained, the balance auto-transfers to the nurse/centre/vendor bank account
- **Razorpay Smart Collect / Virtual Accounts** — optional, for centres that want dedicated virtual accounts
- **Security deposits** (equipment rental) — captured via auth-and-capture, released/refunded automatically after inspection
- **Subscriptions** — Razorpay Subscriptions for long-duration monthly centre billing, replacing manual repeat bookings
- **Refunds** — instant-refund-to-wallet for cancellations, plus a full bank-refund option
- **Invoicing** — GST-compliant invoice auto-generated per transaction
- **Webhooks** — payment status updates the booking status in real time

SECTION 08

Trust, Safety & Legitimacy Layer

Cutting across all three sides of the marketplace

- Three-tier public badges: **ALLCURO Verified** (documents checked) → **Site/Field Verified** (physical visit done) → **Elite/Top Rated** (sustained high ratings, 50+ completed bookings)
- Two-way reviews everywhere — customer↔nurse, customer↔centre
- Insurance tie-up (phase 2) — accident/liability cover for nurses on duty, service-guarantee cover for customers
- Grievance redressal SLA displayed (e.g. “complaints resolved within 24 hours”)
- All chats/calls stay in-app with masked numbers — protects privacy and gives ALLCURO a dispute-resolution audit trail

SECTION 09

Suggested Build Phasing

Phase	Scope
MVP — Phase 1	Customer app + nurse booking (part-time gig model) + basic KYC + Razorpay checkout + admin verification queue
Phase 2	Home care centre marketplace — listings, ratings, site-verification workflow
Phase 3	Medical equipment rental — deposit-based checkout, delivery/pickup logistics
Phase 4	Full-time in-house nurse payroll module, training/certification academy, insurance, subscriptions, city-manager analytics

RECOMMENDATION Ship the nurse-booking loop first — it validates demand fastest with the least legal/compliance overhead, before taking on centre site-visits and equipment logistics.
